SOFTWARE PROJECTS

Tidy Mail // source: github.com/serenagibbons/tidy-mail

- A C# WPF application developed to declutter a user's email inbox; accesses a user's Gmail messages using OAuth 2.0 and the Gmail API to view the user's inbox and delete selected messages
- Enables users to search through their Gmail messages using Gmail search operators and delete up to 1,000 emails at a time, using threading to retrieve and delete emails while updating the GUI

Recipe Blog // source: github.com/serenagibbons/recipe-blog

- An ASP.Net MVC application written in C# to model a cooking blog
- General users may view recipes while an administrator may post, edit and delete recipes using SQL Server Express
- Pages were designed using MVC design, HTML with Razor syntax, CSS, and Bootstrap

WORK EXPERIENCE

Mathematics Tutor // July 2019 – Present

Farmingdale State College, Farmingdale, NY

- Tutor college students in mathematics, including but not limited to statistics, calculus, and linear algebra
- Provide homework help, exam preparation, and review of lesson material to students and ensure that students gain a greater understanding of the subject
- Maintain a detailed record of tutoring sessions including the student tutored, course, and length of session

Emergency Department Medical Scribe // June 2017 – May 2018

ScribeAmerica, Huntington, NY

- Accompanied ED physicians during patient visits and assisted with documentation such as recording patient medical history and exam findings into the electronic medical records
- Managed confidential patient information including accessing patients' past medical history and previous patient visits according to HIPAA standards
- Maintained medical chart efficiency to increase ED patient flow
